Test Case Template

Test Case#: 2.8	Test Case Name: admin gives role
System: Feedback App	Subsystem: teachWise
Designed by: Susa Rinne	Design Date: 24.11.2023
Executed by: Susa Rinne	Execution Date: 27.11.2023
Short Description: Admin can change user role – gives teacher permissions to student role	

Pre-conditions:

- user that logs in must be admin

- user that is looked up must be student

Step	Action	Expected System Response	Pass/ Fail	Comment
1	Log in as admin user	Logs in with admin credentials.	pass	
2	Click on admin panel button	Proceeds to admin panel from the Dashboard.	pass	
3	Find user using search	Looks for user with username. If found, user details open. If not, nothing happens.	pass	
4	Check select box value	Looks for the default value in the dropdown. Saves value as current user role.	pass	
5	Change user role from dropdown	If user role is 'STUDENT', function giveTeacherRole changes it to 'TEACHER'. If base value is something else, test finishes.	pass	
6	Verify new user role	Re-enters user details and checks that user role was changed in the select box.	pass	

Post-conditions:

- success: output "The user now has the ${userRole} role"

- fail to retrieve current role (unlikely): output "Unable to determine the user's role"

- user role is teacher: "The user is already a teacher. Aborting."

- user role is admin: "The user is an admin. Aborting."

- user role is something else (unlikely): "The user's role is unknown."
