Test Case Template

Test Case#: 2.6
System: Feedback App

Designed by: Susa Rinne

Executed by: Susa Rinne

Short Description: Teacher is able to accept user's enrollment request on a course

Test Case Name: accept user to a course
Subsystem: teachWise

Design Date: 23.11.2023

Execution Date: 26.11.2023

Pre-conditions:

- test user is a teacher with ID 3 (called "teacher2")

- user needs to be a lecturer on at least one course

- the course needs to have at least one pending enrollment request

---

Step	Action	Expected System Response	Pass/ Fail	Comment
1	Login with teacher credentials	Is executed before the test. System logs into the web app as user 'teacher2'.	pass	
2	Find course cards and click each	Finds all courses.	pass	
3	Click on each course in for loop	Starts looping through courses.	pass	
4	Enter enrollment details	Checks whether there are enrollment requests. If not, goes back and repeats step 3.	pass	
5	Request found	Accepts the first request that is found.	pass	
6	Optional: confirm that accepted user is in course participants	Activates Participants tab and looks for ID of accepted user amidst the participants. Work in progress.	fail	Additional step. Does not affect main test.

Post-conditions:

- if lecturer has no courses, message "Dashboard contains no courses"

- if none of the courses have enrollment requests, test times out

- if request is found, it is accepted
